Skills

Frameworks

Soft Skills

- communicate effectively and efficiently
- able to grasp new concepts quickly and efficiently
- thinks critically to solve problems
- coordinates and completes tasks and manages projects effectively

Interests

- skiing, hiking, traveling
- spending time with friends and family

Professional Summary

I am software engineer devoted to creating web, mobile and system applications that provide intuitive services backed with data to resolve complex problems. I am currently a student at the University of Utah and will graduate in Spring 2020 with a Bachelor's degree in Computer Science and a Minor in Mathematics.

I am an experienced web and mobile developer and enjoy creating elegant applications and working with data to create intuitive solutions.

Relevant Experience

- Designed and built an Android app in React Native combined with Yelp API to find top rated nearby restaurants based on user-input for food type, location and search radius. the app provides restaurant information and location helpful to those looking for places to eat
- Designed and built a Slack app plugin for bulk deletion of user's messages with a Node.js server in Express framework and hosted with Heroku. The application authenticates users using Slacks API and oauth2, solving the problem of not being able to delete all your messages in a conversation.
